

RAWAN YASSER

Frontend React & TypeScript Developer | Prompt Engineer | AI-Powered Website Creator

Cairo, Egypt | +20 1025104928 | rawan2972000@gmail.com | github.com/RawanYasser297 |
rawan-portfolio-five.vercel.app

PROFESSIONAL SUMMARY

Frontend React & TypeScript developer and certified Prompt Engineer specializing in building modern, performant websites with AI-powered workflows. Skilled at crafting structured prompts to enhance AI outputs, automate development tasks, and accelerate the design-to-deployment cycle. Combines hands-on React/TypeScript expertise with deep proficiency in AI tools to deliver polished, production-ready web experiences.

SKILLS

Frontend Development	AI & Prompt Engineering	Tools & Platforms
React.js / TypeScript (TSX)	Prompt Engineering	ChatGPT / Claude / Gemini
JavaScript (ES6+) / HTML5 / CSS3	AI Workflow Design	Vercel / Vite / npm
SCSS / Tailwind CSS	AI-Assisted Web Dev	Git & GitHub / VS Code
Reusable Component Architecture	Automation via AI Tools	Figma (Basic) / REST APIs

EXPERIENCE

Prompt Engineer (Certified)

2026

One Million Prompters Initiative – Dubai Future Foundation

- Completed professional certification in prompt engineering for generative AI systems.
- Designed and applied advanced prompting techniques (role prompting, chain-of-thought, context design) to accelerate frontend development.
- Built AI-assisted workflows to generate, review, and optimize React/TypeScript components.

Frontend Developer Trainee

2025

Almdrasa Platform

- Built fully responsive user interfaces using React and TypeScript with reusable, typed component architecture.
- Applied modern frontend best practices including state management, hooks, and modular SCSS styling.
- Leveraged AI tools to speed up prototyping, code review, and UI generation workflows.

AI & FRONTEND PROJECTS

AI-Powered Website Development

- Designed structured prompts to generate and iterate on React/TypeScript frontend components, cutting development time significantly.
- Built fully responsive, accessible layouts combining AI-generated code with manual TypeScript optimization.
- Delivered production-ready sites deployed on Vercel with clean component structure and type-safe codebases.

AI Productivity & Automation Workflows

- Created prompt templates to automate research, content generation, and repetitive development tasks.
- Integrated AI tools (ChatGPT, Claude, Gemini) into daily dev workflow for code review, debugging, and documentation.

EDUCATION & CERTIFICATIONS

Bachelor of Commerce – Accounting
Ain Shams University | Grade: Very Good

2018 – 2022

Frontend Development Scholarship

2025 – 2026

Almdrasa Platform — React fundamentals, TypeScript, practical projects, modern web dev practices.

One Million Prompts Certification

2026

Dubai Future Foundation — Focused on Prompt Engineering and AI productivity.
